EDUCATION

B.Tech in Electronics and Communication Engineering

Sardar Vallabhbhai National Institute of Technology

08/2020 - Present

Surat, Gujarat.

Primary and Secondary Education (10+2)

Aditya Birla Higher Secondary School

07/2007 - 05/2019

Veraval, Gujarat

Courses

▫ Standard 10th : 92.67%

▫ Standard 12th : 87%

PERSONAL PROJECTS

Huffman Compression Algorithm using Rust [↗](#)

▫ Huffman algorithm was a part of one of our Communication Courses. I thought about its implementation on data/file compression and researched about it. I was learning Rust for programming at the time and decided to use it to make this project on it.

Fit-Pro : an Exercise guiding Web-App [↗](#)

▫ Fit-Pro is an exercise guidance app made using React in Javascript. I am a fitness enthusiast and regularly go to Gym. This web app is a great source of proper exercise guidance which helps people on the go, in between their workout sessions.

QnA and Text Summarizer - NLP Transformer based Web Apps [↗](#)

▫ Made using Hugging Face LLM pipelines and Pytorch/Tensorflow. Both web apps implement NLP based on Pre-trained LLMs from Hugging Face. Used Python in Jupyter Lab.

▫ QnA - It answers the questions based on the given context text/Wikipedia link you provide using deepset/tinyroberta-squad2 Transformer model pipeline.

▫ Text Summarizer - It summarizes the input text using the model Falconsai/text_summarization pipeline from Hugging face.

YT2MP3 - An API based web app to Convert your Favourite Video Songs to downloadable MP3 file [↗](#)

▫ We often go through songs or podcasts on youtube and think about it being able to be saved in our local playlist to listen offline. I created this web-app using Embedded Javascript in Node and Express for backend function, which does exactly that. You paste a link on the web app and it converts the video to MP3 of the Youtube video.

CLUB ACTIVITIES

DRISHTI (07/2021 - 02/2022)

I was a member of the Electronics and Technical Club of my college, DRISHTI. I worked on a scientific calculator in a team of 4 and used Atmel Studio and Proteus Design Suite to complete my work.

CERTIFICATES

HTML,CSS and Javascript for web Developers [↗](#)

Learnt about basics of Web Development in this course.

Machine Learning Specialization [↗](#)

It was a specialization course consisting of three courses in total and covered all contemporary Machine Learning Techniques.

Natural Language Processing Specialization [↗](#)

Its a four course specialization in natural language processing using Probabilistic model and Sequence Model.

SQL for Data Science [↗](#)

Learnt about DBMS and various SQL queries on any database. Various uses of SQL queries in database analysis.
